Radu N. Covaci

MSc in Mind and Body Sciences, Psychologist

CONTACTS

Email: raducovaci10@gmail.com
Website: raducovaci.github.io

PROFESSIONAL EXPERIENCE

Academic Research (2024-ongoing)
Master's thesis research on the **computational** aspects of **social synchronicity**, with a focus on extracting social features from **multimodal data** (under Prof. Diano).

Psychology Traineeship (2026)
Six-month placement as a trainee psychologist in the **Clinical Psychology** unit at Molinette Hospital, Turin, specialising in psycho-oncology (under Prof. Stanizzo).

Student Research Assistant (2024)
Contributed to two research projects: one on **visual perception** (Consciousness and Cognition, 2025) and one on the **placebo effect** (under Prof. Piedimonte).

Medical Student Internship (2019-2020)
Emergency department placement at Ospedale Santa Chiara, Trento, Italy.

TECHNICAL SKILLS

Neuroimaging & Data Acquisition
- EEG and fNIRS collection and preprocessing
- Hyperscanning for multiple-subject paradigms
- Multimodal behavioral data collection

Data Analysis
- End-to-end analysis pipelines from raw signal to publication-ready results using tools such as Python (NumPy, Pandas, MNE), R, MATLAB, API calls (LLMs).
- Statistical modelling

Clinical Experience
- Patient assessment and interview
- Psychological tests and questionnaires administration and scoring

Research Methods
- Experimental design and participant recruitment and management
- Academic writing and literature review

EDUCATION

MSc in **Body and Mind Sciences,** University of Turin; sep. *2024-nov. 2026*
BSc **in Psychological Sciences and Techniques;** University of Turin; *sep. 2021-july. 2024*
Student of **Medicine and Surgery**; University of Padua; *sep. 2017-mar. 2020*

RESEARCH OUTPUTS

Higher-order models for fNIRS hyperscanning in complex and ecological interactions. (*Manuscript in preparation, Author and Contributor*).
Master's Thesis: "Use of modern LLMs in psychology research: extracting social features from multimodal data in social settings"
Bachelor's Dissertation: "The predictive brain: understanding depression through allostasis"

OTHER

Research Interests
Computational (cognitive and affective) neuroscience; predictive processing framework; pain; placebo effect.

Languages
Native: Italian, Romanian
Proficient: English (C2)

Hobbies & Passions
AI, competitive games, space, biotech.
